Art Unit: 2862

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

(A) Group I, claim(s) 8-11, drawn to a method of analyzing currents on one of

a plurality of underground pipes or cables, classified in class 324, subclass 326;

(B) Group II, claim(s) 12-14, drawn to a method of analyzing currents on a

plurality of cables or pipes involving determining position of pipe(s), classified in

class 324, subclass 326;

(C) Group III, claim(s) 15, drawn to a method of determining the location of an

underground pipe, classified in class 324, subclass 326;

(D) Group IV, claim(s) 16, drawn to a method of powering an electrical device,

classified in class 320, subclass 127;

(E) Group V, claim(s) 17-20, drawn to an interrupter, classified in class 361,

subclass 3.

2. Inventions I-V embody separate invention concepts capable of supporting

separate patents.

3. The inventions are distinct, each from the other because of the following

reasons:

Application/Control Number: 10/609,504

Art Unit: 2862

Invention I drawn to a method of analyzing currents on one of a plurality of underground pipes; Invention II drawn to a method of analyzing currents on a plurality of pipes wherein the position of the first pipe is determined from the detected magnetic field; Invention III drawn to a method of determining the location of an underground pipe wherein a model of a virtual magnetic field is being generated by a virtue pipe with a current flowing it; Invention IV drawn to a method of powering an electrical device and Invention V drawn to an interrupter for controlling the negative protection voltage. Thus each group has divergent subject matter and has a separate utility as explained above.

Page 3

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for one Group e.g. I-V is not required for another Group e.g. I-V, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/609,504 Page 4

Art Unit: 2862

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

- 7. A telephone call was made to Mr. Dennis P. Cawley on April 6, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 7:00-5:30.

The fax number for the organization where this application or proceeding is assigned is 703-872-9306.
